ABOUT ME

Final-year student computer science student at Swinburne Sarawak who leads teams and builds software systems from the data through to deployment. Seeking a full-stack developer role working across the frontend, backend and database.

PROJECTS

SPEX, Final Year Project

- Led a five-person team building a full-stack system that predicts and maps outbreak risk for 38 diseases across 245 countries.
- Owned integration and deployment: FastAPI backend on Railway, frontend on Vercel, Supabase PostgreSQL and an automated weekly data refresh.

BuildUp, URIIS Student Biz Innov Challenge 2026, Top 5

- Co-created a national AI talent platform concept aimed at the graduate skills mismatch in Malaysia.
- Prototyped web and mobile apps with skills-based job matching, an AI career coach built on the Anthropic API, a digital Skills Passport and workforce planning dashboards.

LEADERSHIP & VOLUNTEERING

Programme Coordinator, Swinburne Sarawak Dodgeball Club ECA at Borneo International School

- Set up and ran weekly dodgeball sessions for students after securing school approval
- Built Excel systems from scratch for attendance, coach scheduling and pay, season planning and finance
